

BOSE® SOLO 5 TV SOUND SYSTEM

Better Sound for Your TV, Now With Bluetooth® for Streaming Music Wirelessly

February 21, 2016 – The Bose Solo 5 TV sound system is a one-piece soundbar that dramatically improves TV sound and needs only one connection from the speaker to the TV. It features Bluetooth connectivity for wireless music streaming, and an advanced remote makes controlling the system, TV and other connected sources easier than ever.

The Solo 5 system joins the Bose Solo 15 system in the Bose Solo family. It's small and versatile enough to be placed in front of the TV, on a shelf, or wall-mounted, measuring just 21.6" wide, 3.4" deep and 2.8" high.

The Solo 5 system features two drivers for spacious performance. Similar to the Solo 15 system, it has a separate "dialogue" mode that brings words more to the forefront, along with digital signal processing for optimal sound at any listening level, and proprietary TrueSpace® technology that distributes audio well beyond the screen and speaker itself. For TV programming with dramatic soundtracks and music, the Solo 5 system reproduces the full-frequency range, and features a bass control function so you can adjust the bass to your preference. So whatever you're watching -- from network programming to entertainment shows, news, concerts or sports -- you get the entire experience: amazing video and equally remarkable audio.

With built-in Bluetooth technology, the Solo 5 system is also a wireless music system for streaming playlists, music services, or virtually anything else from your phone or tablet. You can listen to everything you'd listen to through Bluetooth headphones and portable Bluetooth speakers through the Solo 5 system just as easily, but with more power and performance.

Pricing and Availability

The Solo 5 TV sound system is now available from Bose for \$249.95, and the Bose Solo 15 Series II system remains available for \$449.95. They're available at Bose retail stores, authorized Bose dealers and Bose.com.

About Bose Corporation

Bose Corporation was founded in 1964 by Dr. Amar G. Bose, then a professor of electrical engineering at the Massachusetts Institute of Technology. Today, the company is driven by its founding principles, investing in long-term research with one fundamental goal: to develop new technologies with real customer benefits. Bose innovations have spanned decades and industries, creating and transforming categories in audio and beyond. Bose products for the home, in the car, on the go and in public spaces have become iconic, changing the way people listen to music.

Bose Corporation is privately held. The company's spirit of invention, passion for excellence, and commitment to extraordinary experiences can be found around the world -- everywhere Bose does business.
